## Azure

# The Rehydration Station

## Rehydrate your staff...

Re-hydrate your staff with an unlimited supply of pure still or sparkling water along with a flavoured drink at the touch of a button, direct into your own glass or bottle.

The Azure enables you to provide a cost-effective, green alternative to traditional water coolers and bottle water dispensers

Features include:

- an unlimited source of safe, mains-fed filtered quality water
- high capacity filters and flash cooling technology ensures a constant supply of chilled water - no matter how high the demand.
- Each drink is dispensed in a cup or your own receptacle can be filled.

Drink options include:

- ✓ Still and sparkling chilled water
- ✓ Still and sparkling Orange Crush or Vimto

MODEL	PURCHASE *		RENTAL**	OPERATING FEE***
<b>STILL ONLY</b>	<b>£4,500</b>	Includes 36 months warranty	<b>£33.24 per week</b>	<b>£20 per week</b>

\*\* Rental price is for minimum 36 months and includes parts and labour warranty

\*\*\* The operating fee covers filling and cleaning during the week

Rental includes two filter changes per year (and UV bulbs if applicable) and parts/labour maintenance cover

## Environmental Impact

- No more plastic bottles
- Reduced dependence on oil-derived plastics
- Zero emissions caused by transporting water bottles
- Better energy performance (machines Energy Star rated and/or have a low power sleep mode)
- All chemicals used in production by Waterlogic are non-toxic and environmentally friendly
- Waterlogic machines made with easily recyclable plastics.
- Waterlogic water dispensers use a natural non toxic refrigerant gas in their compressors

## What is the Carbon Reduction label?

The Carbon Trust certifies the total amount of carbon dioxide (CO<sub>2</sub>) and other greenhouse gases emitted by a product or service at every stage throughout its life cycle. This includes manufacture, transportation, installation, service, usage and final disposal. It provides an accurate, independent and verifiable measure of the greenhouse gases emitted by the certified products.

## Why is it important?

Energy saving water is increasingly becoming a concern for many organizations. By having certified a CO<sub>2</sub> footprint for the Waterlogic water dispenser service we're now able to provide information allowing customers to make informed, sustainable purchasing decisions and meet their own environmental targets.
