## Portofino

**Mario Ciappelli, owner of Portofino Restaurant has enjoyed numerous benefits by installing the Watermarques system in his beautiful fine dining establishment on the quayside in Douglas. Installed in September 2012, the drinking water system has provided both financial and operational advantages.**

“We fill our own Portofino Restaurant branded bottles from the system as and when needed, thus doing away with the need to buy, store, chill and then pay to dispose of large quantities of glass and plastic bottles. This saves us time and, of course, money – savings which we are happy to pass on to our customers”.

Mario has already recommended the Watermarques system to a number of his colleagues in the restaurant business. He summed it up perfectly when he said; “There is no reason not to like this system; it saves money, it’s easy to use and the bottles look great on the table.

“The benefits to the customer though are the greatest – as ultimately they pay less!”

## Mannin Hotel

**At The Mannin Hotel, General Manager Rom Kesa’s main consideration was to provide his guests with something Manx, but a bit different, that would reflect the profile of the hotel and promote brand awareness for the business.**

They provide their guests with fresh, purified, chilled Manx drinking water, which is served to guests in elegant Mannin Hotel branded bottles.

“The system has proved extremely cost effective, – particularly for the water we provide to the hotel bedrooms; our guests really love the bespoke branded bottles.”

Rom and his team are very aware of the environmental impact of plastic bottles and this system eliminates the need for deliveries and disposal of plastic waste, thus reducing their carbon footprint.

“I would strongly recommend this system to other local businesses; it’s cost effective, environmentally friendly and a great way to demonstrate corporate social responsibility.”

The stand alone water dispenser is connected to the mains water supply and designed to meet the needs of venues where there is a high water consumption. Through its unique filtration system, chilled still and sparkling water is provided in bespoke branded bottles.

- ✓ Uses bespoke engraved bottles
- ✓ No transportation of heavy glass bottles
- ✓ Removes the need for plastic bottles

Free-standing Niagara	£4999 + vat	£38.50 + vat per week
		Minimum 36 month contract
	Includes 200 branded bottles	
Dimensions:	Height	1480 mm
	Width	480 mm
	Depth	560 mm

# Tynwald Mills

**With the war on single use plastics gaining momentum, public awareness is increasing daily.**

With this in mind, Tefine Butler, Restaurant Manager at Tynwald Mills is in no doubt that recyclable glass bottles will become the norm in cafes and restaurants. She believes that customers expectations are shifting significantly and very soon single use plastic packaging will no longer be acceptable.

Tynwald Mills are ahead of the game with a Watermarque system installed in their restaurant kitchen. The glass reusable bottles are beautifully presented in clear and frosted glass to distinguish between still and sparkling water. Their smooth and simple design provides a sophisticated means of serving an environmentally friendly, pure filtered water in any setting.

“This system has saved us a fortune and we are delighted with the environmental credentials; I wouldn't hesitate to recommend it to other businesses similar to ours.”
